

Sustainable Procurement Policy

As a provider of sustainable logistics for a world in motion, it is our policy to reduce the ESG (Environmental, Social and Governance) risks throughout our supply chain, while also contributing to economic, environmental and social progress with a view to achieving sustainable development.

Our Commitment

- Set objectives, action plans and KPIs in support of this policy, regular monitoring and public reporting on progress, and pursuing continuous improvement of our practices.
- Prioritise suppliers who have sustainable and ethical practices within their respective organisations and who drive such practices throughout their own supply chain.
- Identify environmental, social and governance risks within our supply chain and collaborate with suppliers to manage those risks.
- Comply with local, national, and transnational regulatory policies.
- Encourage our business partners, suppliers and sub-contractors to apply principles of responsible business conduct compatible with the UN Global Compact, UN Universal Declaration of Human Rights, the International Labour Standards (ILO Declaration on Fundamental Principles and Rights at Work) and the OECD Guidelines for Multinational Enterprises.

Our Strategy

Through our supplier selection process and engagement, we will seek suppliers that actively:

- Strive to reduce their environmental footprint
- Improve conditions for people and society
- Drive ethical economic growth

All suppliers are expected to conduct their business consistent with the environmental, social and governance standards and practices outlined in the Wallenius Wilhelmsen Supplier Code of Conduct.

This policy is communicated throughout the Company and is available publicly on our website. It will be reviewed on a regular basis to evaluate continued relevance and drive continual improvement.
